. Como las columnas de hoy en día el principal riesgo es en el empleo lo que desean buscar a uno la agilidad y el confort casi siempre lo encontramos en el restaurante.--- title: Outliners / FileGroups for Project Design page\_title: Model Binders in the TypeScript/HTML Editor | Kendo UI Widget Training Series description: "Learn how to use outliners and filegroups in the Kendo UI HTML and TypeScript editors." previous\_url: /training/editor-controls/outliner/filegroup/ slug: howto\_get\_started\_html\_editor\_outliners\_filegroup --- # Outliners / FileGroups for Project Design The outliner panel is used for exploring the structure of a project. It shows the properties and items in the project, and it lets you quickly expand and collapse items. ![The outliner window in the Kendo UI Widget Editor.]( The following image shows the left pane, which is the Outliners window, and the right pane, which is the file group. The file group is a convenient tool for organizing your project structure. After you create a file group, you can open multiple files in this group. When the files in a file group are opened, they show in the Outliners pane. When a file is opened in the Outliners pane, it is added to the file group. This way, you can keep the files of your project in one place. ## See Also \* [How to Use the Editor Controls in the Kendo UI Widget Editor in HTML and TypeScript]({% slug howto\_get\_started\_html\_editor\_outliners\_filegroup %}) \* [Outliners Window (Outliner Window)]({% slug howto\_outliners\_window\_outliner %}) \* [Kendo UI Grid Basic Concepts]({% slug howto\_grid\_basics\_howto\_outliners %}) An artist's impression of the proposed Dublin Airport expansion. Photograph: Dublin Airport Authority Ministers have confirmed Dublin Airport has been chosen as the site of a new 4km runway. 82157476af
