Can't make it to class? Want to go over everything? Kaplan's expert USMLE Step 1 lectures on YouTube provide a wealth of information and guidance. We've searched high and low for the best lecture series available on YouTube, and we think Kaplan is the best option out there. If you're looking for a review of topics you've missed, or just want more details on some tricky concepts, then these videos will help prepare you for your exam. Our favorites include lectures on pathophysiology, biochemistry, pharmacology, histology, microbiology, hematology and more.

Critical thinking is especially important in the study of medicine—you've got to be able to make sense of your patient's symptoms and most importantly, figure out what might be causing them. This is an important skill every medical student needs to develop. The Kaplan Critical Thinking videos offer a great review of the necessary aspects of the critical thinking process in medicine—and even more importantly—why it's so important. This series features experts from around the country, and it's a great way to enhance your clinical skills.

The Kaplan USMLE Step 1 Lecture Videos can also be accessed via the Kaplan Mobile App for iPad.

Released in July 2014, the Kaplan High Yield Behavioral Science Flash Cards are a quick-reference tool that allows students to review high-yield topics from behavioral science in a small notebook format that is easily portable. It includes topics such as personality disorders, mental status exam findings, and many others in a 16 page booklet with high definition grayscale images on one side and reference information on the back of the card. The cards can help students prepare for questions of this format on the USMLE Step 1 exam.
